Re: Our Recent Project Together

Dear Bill:

I am writing to tell you how pleased I am with the level of service, support, and installation from you, Gregg, and Rhoads in general, at the Rapid Cool project for the Port of Wilmington, Delaware.

As fast-track as the whole project was, in hindsight I would not change even one thing, in the way you and Rhoads completed our work in near record time. There was zero re-work, and a punch list that took maybe 10 minutes to complete, if even that.

I highly recommend you and Rhoads to any company looking for a crew that can hit the ground running, and pitch in to solve problems, instead of digging in to compound them and profit from them. Please feel free to list me as a reference, on any new work you might pursue.

PS: It turned out to be a beautiful project, too, a couple of photos are included below.

Sincerely,

Global Cooling Inc.
James D Still, President
