RE: Letter of Thanks

Mark,

As plant manager here at Wheelabrator, I wanted to provide a letter of commendation to Rhoads Industries. The "Bottom Ash Conveyor Platform" project was a success in many ways due to:

- 1) Your crew is extremely professional and has a great understanding of safety.
- 2) The quality of the fabrication was the right fit-finish.
- 3) Overall the project was completed in a timely manner with competitive costing.

I will keep you guys on the bidding list; your work has been top-notch! I will also pass this info along to our sister plant in Pennsylvania.

Thanks again and we look towards working with the Rhoads crew again upon our next project.

Sincerely

Michael Kissel
Plant Manager
Wheelabrator Gloucester Co., L.P.
