

CASE STUDY

Ocean Spray

CLIENT SITUATION

Rhoads was contracted by A&B Process Systems to work on a new Ocean Spray Cranberries bottling plant in Breinigsville, Pennsylvania. Rhoads initially worked for A&B Process Systems on a complex rigging and equipment setting portion of the same project.

RHOADS SOLUTION

Rhoads installed 17 silos which will be used to hold water, liquid sugar and juice concentrates. The weight of the silos ranged from 16,000 to 27,000 pounds each. In addition to setting the silos, Rhoads also installed ladders, guardrails and transfer platforms. Rhoads was also awarded a process piping contract to install the air, glycol, steam and condensate and hot water lines.

RESULT

Throughout the duration of the project, Rhoads was contracted by numerous other companies at the site to complete work including platform fabrication and installation, additional rigging and equipment installation and on-site welding support. Rhoads continues to work with Ocean Spray Cranberries directly, providing ongoing maintenance support.
