

CASE STUDY

Clark Technology Systems

CLIENT SITUATION

Clark Technology Systems sought the specialized millwrighting, rigging and welding services of Rhoads to develop and ship a unit that was too large and heavy for their shop. During this time, the Company maintained a large backload of work to complete.

RHOADS SOLUTION

Rhoads maintained the shop space, crane capacity and talent to fabricate and assemble a large reciprocating compressor. We fabricated the base and assembled, tested and piped the compressor. In addition to tagging all components, electrical was installed so the skid was plug-and-play.

RESULT

Rhoads shipped the unit from Clark Technology Systems to a barge via self-propelled Goldhoffer trailers. From there, it was shipped to a North Atlantic refinery in, Come By Chance, Newfoundland.
